

Staff Physician

Overview

We are looking for a family or internal medicine board certified or eligible physician to join our primary care team and provide patients with high-quality treatment and diagnostic services. The ideal candidate is a compassionate healthcare professional committed to our mission of “spreading Christ’s love through quality healthcare to those in need.” The person in the Staff Physician role will be responsible for meeting, assessing and diagnosing patients in our clinic and providing them with healthcare services that meet state and national standards for caregiving. The right candidate will have a passion for providing healthcare that responds to the multiple facets of health, collaborating with multidisciplinary team members to address the patient’s mental health, nutrition, and social needs. Although speaking a second language is not required, the Physician will need to be comfortable providing care for people of multiple cultural backgrounds, particularly Spanish speaking patients. Our clinic is a certified patient centered medical home, and the physician will be expected to work at least some Saturdays. The physician may also be asked to supervise nurse practitioners and physician assistants.

Duties & Responsibilities

- Demonstrate familiarity with high risk populations, community settings and care of medical patients.
- Supervise clinical services delivered by the clinic extenders as stipulated above.
- Provide medical services to patients during scheduled sessions. Maintain credentialing requirements.
- May be full time or part time.
- Regular attendance is an essential function of the job. Perform other duties as assigned or required.

Staff Physician Requirements & Skills

- MD or DO degree. Board certification or eligibility required.
- If board eligible, board certification is required within the first year of employment
- Maintain a state license and DEA number without restriction required
- Maintain current CPR/BLS certification
- Knowledge of clinical practice of medicine, health care delivery systems, utilization methods and treatment
- Experience conducting evidence-based treatments
- Communication skills both oral and written, ideally both in English and in Spanish
- Background check required on employment
- Updated COVID vaccinations
